Subject: FW: Potential project with Univ NE-Lincoln; seeking review and coordination

Thanks for including me on this email thread...I was actually going to talk to you about it soon to see what you knew anything about the project. Elin and Brett Blackwell were chatting about it at our monthly meeting last week, and I know Brett was planning to talk to you. I mentioned that our NTA methods have a built in suspect screening library for several hundred pesticides, and our expertise here in the more eco-surface water type chemistry seemed to be a really good fit for the problem. I have also known Dan Snow for a very long time, and would love to work with him again.

Yes, I suspected that might be a problem. Are you thinking an internal meeting first and then a second meeting with UNL or just one with UNL. If it is the former, can you arrange it with the UNL and/or the Regional people? I have not been in contact with them directly.

I totally agree. I'm hoping to discuss at an upcoming NTA biweekly meeting, but that would just be EPA folks. We need to connect with UNL again too!

Can it wait until performance appraisals are over? My calendar is full this week and next!
